TECH CENTER 1600/2900

Commissioner for Patents  
Washington, D.C. 20231

Dear Sir:

This is in response to the Office Action mailed September 6, 2002. Reconsideration of the application in view of the following amendments and remarks is respectfully requested.

**In the Specification:**

Please replace the paragraphs at page 16, lines 8-18; page 24, lines 1-7; page 24, line 29 to page 25, line 4; page 27, lines 2-11; and page with the following amended paragraphs. A marked-up version of the paragraphs is attached.

Page 16, lines 8-18:

The anchoring group may be attached to the peptidomimetic at either end (in the case of a peptoid, at either the C- or N-terminus). It can be attached either as a submonomer (e.g., a substituted amine), or as a modification of a peptidomimetic (e.g., peptoid) side chain after synthesis. Alternatively, in another example, the anchoring group may be present as a linker connecting the peptoid to a beaded solid support upon which it is synthesized. This linker may be cleaved from the resin along with the peptoid, to provide a readily available anchoring group.
